

# Login Ads

The process is not complex but you need to make sure the page you want people to see displays and gets people where you want them to go!

Here are the steps:

1. Choose a program that you wish to promote
2. Get the splash page url from the opportunity making sure it carries your affiliate link
3. Go to multiplywesa.com and log in
4. Select advertising>login ads from the menu
5. If you have no credits select buy credits
6. If you have credits, you can add the splash page URL of your choice
7. Add a campaign name so you know what you have advertised
8. Select the number of credits to add (1 credit per view)
9. Click preview
10. Click to test the page displays correctly
11. If display is good click add and it will be submitted for approval
12. If display does not show your page in the frame watch [the tutorial video](#) for how to overcome this obstacle

Some links to tools I used...

All In One Profits (monthly fee of \$11.25) – get the link from [the downline builder here](#)

[Paint.net](#) FREE

[Snip & Sketch](#) FREE comes already installed in windows I think

Code to add an image:

```

```

Code to add a clickable image:

```
<p><a href="PUT THE URL LINK WHERE YOU WANT TO SEND PEOPLE HERE"  
target ="blank"></a></p>
```
